GRADUATES  
TOMORROW

Robert A. McCullough, B. Comm., Son of Mr. and Mrs. A. McCullough, who will receive the degree of Bachelor of Commerce on Friday May 13, at the Convocation of the University of Alberta.

During his University studies, Bob has been continually in the spotlight in student activities, and was the President of the Commerce Club during the past year. Mr. McCullough has accepted a position with the Imperial Oil Company of Calgary.

### Orderly Methods in Oil Industry Saves \$5,000,000 For West.

On the basis of 1937 quantity consumption, users of petroleum products on the prairies will save \$5,000,000 this year by reason of reductions in prices of light petroleum products since the Turner Valley was established as an important oil field. If good crops favor the west, there would be even a larger saving incident to larger consumption of products.

The saving is even more substantial when one considers that the history of an oil field in the making is frequently one of costly disturbance. Adequate transportation facilities have to be provided. Other sources of supply have to be displaced. For instance, a few years ago when the Texas oil field was being developed, there was a serious disorder. An important natural resource was wasted. Investors lost heavily and all interests suffered.

In striking contrast to such experiences have been developments in the Turner Valley. Cooperation of producers, pipeline, railways, and refiners, has resulted in an orderly development. Both producers, and to a greater extent consumers, have reaped the benefits. Producers have benefited by a price for crude oil which has been adequate to encourage a steady development of the field. Consumers have benefited by substantially lower prices for petroleum products.

## EXTRA SPECIAL VALUES in GROCERIES for the SEEDING SEASON

Sliced Pineapple, tall cans, each	10c
Evaporated Prunes, in 3 pound bags, each	29c
White Naphtha Laundry Soap, per bar	3c
Pork and Beans, regular 10c, 6 cans	49c
Apple and Raspberry Jam, 4 lb can each	39c
Prepared Mustard, in glass jar with spoon, each	10c
Chicken Starter 6 lbs	27c
McKenzie's Seed Beans, Early Lincoln, per lb.	29c
Onion sets, 3 pounds	25c
New Cabbage, firm heads, 4 pounds	25c
Fresh Rhubarb, 5 pounds for 25c, per case 40lbs \$1.75	
Warba and Early Ohio Potatoes, suitable for seed, per sack	\$1.25

## Women's Institute Hear Fine Address By Mrs. Oldfield

The May meeting of the Champion Women's Institute was held in the United Church on Tuesday, the 10th. When all had gathered, with the High School girls and other visitors, the total attendance amounted to 56. The members of the Institute felt very sorry that the girls could not remain to meet Mrs. Oldfield, who gave the address for the day, and possibly to chat with her during the lunch hour but they were called away to a basket ball game.

The date of the Little Bow Convocation Conference is June 16th; the place, Barons, Mrs. Watkins was appointed as the delegate from the Champion Institute.

At the close of the business meeting, Miss Marjorie Dittus favored the meeting with a vocal solo "Misty Island in the Highlands." The president then called upon Mrs. Oldfield of Milo, our guest speaker, to talk to the high school girls on "Vocations."

Mrs. Oldfield began her address by stating that she wished to consider the word "vocation" as a calling to a "calling", not just a job. The secret of happiness in what you were doing depended on whether you had found a job or a way of life. A good bit of self-analysis was necessary to find out for what you were best fitted.

In some branches of work a certain amount of physical strength was necessary, in others, mental powers. She advised the girls to try to find out whether they were most interested in people, ideas, or things. To be a teacher or a nurse, for example, you needed to like people. The person who had made a success of his life was the one who had found the particular niche into which he seemed best fitted. Mrs. Oldfield outlined briefly various lines of work open to girls, giving the requirements for each and the salary to be expected. She ended her fine address by stating that the highest vocation of all for women was home-making, and it now seemed to be the one for which least training was given. Girls needed to be taught a great many things about the care of the home in the home. But, nevertheless, a good education was never out of both town and country, who find it inconvenient to attend the Saturday Night Show the Champion Theatre has made arrangements to have a special Matinee at 2:30 Saturday afternoon, at special prices of 10-15-25c.

K. R. McLean, \*Optometrist and Optician, 209 and 210 South Main St., Calgary will be in Carmargy at the Drug Store, Tuesday morning, May 17th, and in Champion at the Drug Store Tuesday afternoon.

In order to speed up seeding on the 1st in Mr. Chertowick, east of Champion, seeded 140 acres using his Dodge 1 ton truck as a power unit. The seed wheat was in the truck which gave ample weight to the truck in a pulling position; the seed was transferred to the drill as needed without stopping the outfit.

A delicious lunch was served by Mrs. Little, Mrs. Hummel and Mrs. Farrier.

Mrs. and Mrs. P. Clever, Miss Loureeta Clever and Miss Rita Cumulini were Saturday visitors in Lethbridge.

## LOCALS

Mr. and Mrs. G. K. McLean spent the week end in Vulcan.

Lily Ashmore is a patient in the Vulcan hospital, having broken her arm.

Mr. and Mrs. G. Orr, Miss Edna Orr and Miss Rheta Campbell spent Saturday in Lethbridge.

R. Lee has moved over to the east side of town, into one of Mr. U. S. Alexander's houses.

Miss Dorothy Hummel is progressing favorably, following her recent operation.

Mr. and Mrs. L. J. Adams, who have spent the winter in Spokane, returned to Champion Friday.

Art. Nelson, who has been seriously ill following his recent operation, is progressing favorably.

Mrs. M. Cumulini and family, accompanied by Frank Martin, were Sunday visitors in Coleman.

Mr. and Mrs. W. A. McIntyre have rented the house recently vacated by Mr. and Mrs. W. R. Racher and will take up residence May 15.

Mr. and Mrs. A. McCullough left for Edmonton today, where they will attend the Convocation of the University of Alberta on Friday.

A number of ladies agreeably surprised Mrs. J. Walker on Saturday evening, the occasion being her birthday. A nicely decorated cake was a feature of the evening.

P. Gabenby and Fred Watts drove over to Lake McGregor on Wednesday afternoon, for some fishing, and were successful in catching a few nice pike.

Mrs. T. Bach entertained at a miscellaneous shower recently in honor of Miss Helen A. Fath, a bride of this week. Miss Fath was the recipient of many lovely and practical gifts.

For the benefit of those patrons of both town and country, who find it inconvenient to attend the Saturday Night Show the Champion Theatre has made arrangements to have a special Matinee at 2:30 Saturday afternoon, at special prices of 10-15-25c.

K. R. McLean, \*Optometrist and Optician, 209 and 210 South Main St., Calgary will be in Carmargy at the Drug Store, Tuesday morning, May 17th, and in Champion at the Drug Store Tuesday afternoon.

In order to speed up seeding on the 1st in Mr. Chertowick, east of Champion, seeded 140 acres using his Dodge 1 ton truck as a power unit. The seed wheat was in the truck which gave ample weight to the truck in a pulling position; the seed was transferred to the drill as needed without stopping the outfit.

The lands shall be offered for sale subject to a reserve bid, and the sale shall not include the mines and minerals.

Subject to the reserve bid, the lands shall be knocked down to the highest bidder, who shall, upon payment of the purchase price thereof, be entitled to a transfer of the land sold to him for an area in fee simple thereto free from all other estates, and from all liens, mortgages and incumbrances of every nature and kind whatsoever, other than the charge imposed by any debentures issued under the Irrigation Districts Act, or first mortgages with the meaning of that Act and other than taxes and rates for the current year.

T. A. MIDDLETON, Secretary-Treasurer Little Bow Irrigation District.

C. RHODES, Secretary-Treasurer Champion, Alberta

## WEDDING OF POPULAR YOUNG COUPLE

A wedding of much interest here took place at 10 a. m. on Tuesday, May 10, when Miss Helen Fath, only daughter of Mr. and Mrs. Steve Fath, became the bride of Otto Strauss of Portland, Ore. Father Ritter officiated. The ceremony was performed in the Catholic church.

The bride, gowned in a pale blue floor-length gown, with accessories to match, and carrying a bouquet of roses was attended by Miss Florence Beisenger of Hran, while Robert Fath, brother of the bride, supported the groom.

After the ceremony a large number of guests enjoyed a wedding breakfast at the home of the bride's parents.

The bride is well known here having resided in the district all her life. She attended school in Champion and participated actively in young people's movements.

Mr. and Mrs. Strauss will make their home in Portland.

A banded pigeon, carrying leg band No. 18200CH 37, came to town Tuesday and put up at the Graulin Garage. The bird is a fine looking specimen, and appeared tired on its arrival. However the garage boys came to the birds rescue with food which it seemed to enjoy, and it has been sticking around. Perhaps it is thinking, "another little feed wouldn't do me any harm."

**The Question is, just how far will you ride on a chance?**

## How Does Life Insurance Benefit Living Policyholders?

**Answer.**—It enables policyholders to build a substantial cash reserve for future needs—and at the same time ensure protection for their families.

**Question.**—How does Life Insurance ensure funds for retirement?

**Answer.**—When the need of protection is passed, the proceeds of a policy may be used to provide a guaranteed monthly income.

**Q.**—What percentage of Life Insurance payments are made to living policyholders?

**A.**—Approximately 75 per cent.

**Q.**—How is the balance of these payments made?

**A.**—In death benefits to the beneficiaries of policyholders.

**Q.**—How much money does Life Insurance distribute each year to living policyholders in Canada?

**A.**—More than \$100,000,000 a year.

This is the sixth of a series of messages sponsored by Life Insurance Companies operating in Canada. The seventh, to appear in two weeks' time, will show how Life Insurance savings finance mortgage loans.

## A Dwindling Asset

One can imagine the consternation that would be created in Western Canada if it were predicted that the time is coming within the next present generation when the prairies and the foothills of the Rocky Mountains will be denuded of much if not all of its feathered and furred life; when a game bird would be literally a rare avis and when the appearance of a fur-bearing animal would be so uncommon as to occasion a newspaper paragraph.

To many people such a prospect is unthinkable and to all lovers of nature and the great outdoors such a possibility is almost too painful to mention, yet there are evidences that a disaster of this magnitude may not be altogether imaginative.

Such evidence was forthcoming at a recent meeting in Regina, Saskatchewan, under the auspices of the Fish and Game League, when a hundred participants in a contest which called for suggestions for better methods for the conservation of wild life were unanimous on one thing, and that was that there is a noticeable decline this year in the number of migratory birds visiting the province and that this decline has been going on for number of years.

The evidence was not only applicable to the game birds in which the sportsmen were primarily interested, but extended to the feathered sorters which annually gadden the hearts of residents of city and country. It was stated that they, too, are dwindling in numbers and that their disappearance is only a question of time unless the sportsmen and nature lovers arouse themselves to take the necessary steps to prevent a great disaster.

### A Practical Idea

While opinion as to the dwindling numbers of the denizens of woods and prairie was unanimous, much might be effected by the application to stem the process of ultimate elimination were many and varied. Among them were proposals that bag limits be reduced, open seasons be shortened, a closed season of one or two years for all wild life, except of the predatory varieties, be imposed, that game laws be more strictly enforced, and others.

But one of the most intriguing and perhaps practical proposals came in the form of a suggestion that provision be made for the establishment of a wild life sanctuary of one section of land in every township, coupled with the advocacy of the use of this square mile of land, enclosed by a single-line barbed wire fence, for practical studies in wild life and manifestations of nature by the students of the schools within the township.

Such a suggestion is worthy of some serious consideration, for it gets close to the roots of the problem—the value of education as a means of conserving wild life. The knowledge of the life of bird and beast and fish, together with the development of true sportsmanship and the protective spirit which is inherent in all who observe Nature with understanding and learn to admire her ways.

What child, for example, who has watched the skill with which the parent birds skillfully construct their nests and the loving care they expend in hatching and rearing their young would wish to wantonly destroy the fruits of their pleasure and knowledge? What child to whom the mysteries of Nature have been revealed first hand in this manner would want, when he becomes a man, to take life unnecessarily or to butcher in wholesale manner?

### A Certain Sequence

Yes, education will do much to preserve, not only for the present generation but for those yet unborn, the more precious heritage which has been bequeathed to us by Nature. To know and to understand is to admire and to admire is to protect. It is a sequence which is as unalterable as the laws of the Medes and Persians.

Coincident with the establishment of small but innumerable sanctuaries, restrictive measures might also be applied in connection with campaigns for the slaughter of predatory birds and mammals, such as the crow, the magpie and the gopher.

It is essential, of course, that those species which prey on desirable varieties or which take heavy toll of crops be destroyed, but children should not be encouraged to take part in such campaigns without proper supervision, lest it lead to indiscriminate destruction of good and bad alike.

An illustration of the evil effects of such unrestricted, unsupervised participation in campaigns of this kind on the part of juveniles was recently reported in a large prairie town where a band of youths went out to take crows' nests and nestlings in the belief that they were doing a good work. In the bag they brought back to town were not only the remains of crows and crows' eggs, but it was quite apparent that they had destroyed eggs and young of practically every variety of bird inhabiting the district.

Campaigns of this kind when conducted indiscriminately by young people without proper supervision and by youth who are unable to distinguish between species not only may result in irreparable damage to desirable wild life but tend to develop a lust to kill for the sake of killing, thus perpetuating the antithesis of good sportsmanship.

### Famous Bachelor Dead

Francis Haby, 76, former Kaiser Wilhelm's private barber for 26 years and companion to his imperial master on all his travels, is dead. It was Haby who invented the bayonet-pointed moustache favored by the Kaiser for years before the Great War and adopted by thousands of loyal admirers.

It was once common belief that the moon affected the minds of human beings.

## Before The Great War

World War Not Then Enjoying Peace and Stability

Before the outbreak of the World War we must go back a hundred years to the last preceding world war ending at Waterloo. But it is not true, of course, that the world before 1814 was all peace and stability. It is twenty years since the armistice and we have to reckon with Spain and with Japan in China. Go back twenty years before 1814 and we have to take note of such stable events as the Balkan Wars, a South African war and a Russo-Japanese war. Our own skirmish with Spain in 1898 is minor.

Go back another twenty years from 1814 and we encounter a big Russo-Turkish war, or, by stretching the yardstick a few years, can take in the war between Germany and France in 1870. Go back less than twenty years from 1870 and we must reckon with the greatest of all wars between Waterloo and the Marne—our own Civil War tragedy.

About the same time as our own Civil War there raged in China the so-called Taiping rebellion. How many people in Europe and America were excited over the Taiping war? Some authorities say it cost 20,000,000 lives. But in those days people were not so much interested in the war as we do today by telegraph, cable, wireless, camera and news reels—New York Times.

## LAY AWAKE IN AGONY WITH NEURITIS

### Kruschen Salts Brought Lasting Relief

Ordinary headache is not enough, but they are as nothing compared to the awful pains of neuritis in the head. Such the case of Mrs. H. Kruschen completely banished the

"I had neuritis in the head and right arm. I suffered untold agony with my head and I can never think what might have happened had it continued. Everything I tried gave me a headache like, but it is as nothing compared with the awful pain of neuritis in the head. I spent sleepless nights tossing with a pain."

After taking Kruschen Salts and after some months of the treatment I have found this wonderful relief. Neuritis, like rheumatism and sciatica, is a condition of the internal system (delay) the unmet periodic accumulation in the system of harmful waste material which leads to the formation of excess uric acid.

Two of the most common other ailments of Kruschen assist nature to expel these harmful crystals through the natural channels.

### Exploring The North

English Geologist Spends The Winter At Southampton Island

Thomas H. Manning, English geologist, has arrived at Chesterfield Inlet, 325 miles north of Churchill, Man., from Southampton Island where he spent the winter in exploration work, making the trip over the ice for scientific purposes.

He will return to the island, 125 miles east of Chesterfield, immediately, and later proceed to Baffin Bay, where he expects to spend two years in exploration work. He will receive further supplies from the R.M.S. Naoscap at Cape Dorset this summer.

Manning was leader of four young English scientists who went into the Canadian Arctic in the summer of 1936.

### Letter From Queen Mary

Showed Personal Interest In Coronation Diary Of Toronto Girl

A book, "Coronation Cavalcade," was presented to Miss Jean Black by Dr. Henry F. Munro, superintendent of education for Nova Scotia, in the Royal York hotel, Toronto. With this book came a personal letter from Queen Mary.

Miss Black, fifth form student of Vaughan Road collegiate, has a 200 page leather bound diary on her trip to the coronation which was read from cover to cover by the Queen Mother.

Students from all over Ontario attended the presentation. Richard Graydon, son of the general manager of the Windsor Daily Star, received the first prize for the book's coronation diary.

### Desert Buses Comfortable

New sleeper buses which span the Syrian Desert from Damascus to Baghdad are not only speedy, but also air conditioned and soundproof. They cover the 600 miles in 15 hours. Three inches of insulation in the roofs protect against changes in temperature, which range from zero to 145 degrees above. The stainless wheels are also sealed against the whirling sand.

## Canada's Wild Flowers

Efforts Are Being Made To Prevent Wanton Destruction Of Plants

From early spring until late autumn, the woods, glens and open spaces of Canada are made beautiful by a succession of wild flowers, more varied and as full of charm as the best gardens can provide. To this glorious profusion, however, lurks a danger. Unfortunately many of the flowers, particularly of the larger centres of population, never give a thought to the fact that there may all too soon come an end to this great abundance of wild plant life through heedless destruction.

The preservation of wild flowers does not mean that no one is allowed to pick a bloom, but it does entail due regard to the future of the plant. It demands a little thought. How is a plant to survive if there are not sufficient flowers left on it to form seed, and how can a plant possibly live if it is torn up by the roots, as is too often the case. Tearing a plant up by the roots to gain a bloom is tantamount to destruction and means only one thing—the passing of beautiful wild flowers from the Canadian landscape. Some species of wild flowers, such as violets, hepaticas and others with flower stems rising directly from the roots, may be picked at will, so long as the plant body is not damaged, but other wild flowers like the trillium, Ontario's floral emblem, should never be gathered freely, and a number of fact are that even alone in their natural setting, as the flowers cannot be picked without removing all the foliage on which depends the maturing of the bulb and root for the following season's crop of flowers.

Conspicuous efforts have been made by the various horticultural societies throughout Canada to arouse public sentiment towards the proper protection of the native flora, and though much has been done, still more organized work is necessary on the part of all institutions and the Dominion, bringing home the fact that wanton and destructive gathering of wild flowers will eventually cause the disappearance of the specimens of Canadian wild plants. It is a matter of public education, for people do not wantonly destroy beautiful things, for fear of loss.

In the United States, no fewer than 23 of the States have passed laws designed to protect wild plants. These rules do not prevent the picking of wild flowers, but they do penalize the destruction of roots and plants.

### French Defence Measures

Increase In Man Power For All Nation's Armed Forces

Increase in man power for all France's armed forces has been ordered by Premier Edouard Daladier, head of the national defence government now ruling the nation by decree.

Additional forces in the colonies also will be strengthened by creating of two new battalions of Senegalese colonial troops, among other measures. In addition to raising the navy's man power, the decree authorizes the navy ministry to begin construction before Dec. 31, 1939, of two battle-ships, one cruiser and seven submarines.

Canada is well equipped to produce efficient fighting planes, Brig-Gen. Sir William Alexander said at Quebec, as he headed the Canadian Pacific liner Empress of Australia for the British Isles. Former director of aircraft supplies and productions in England during the war, Sir William said Canada was a "likely place" for Britain to build planes for the Royal Air Force.

One part of Daladier's report to president Lebrun said motorization of the remaining foot units of the army would be speeded up, while another called for an increase in the number of horses and mules for the forces in North Africa to permit speedier mobilization.

The number of workers in military and other factories attached to the defence ministries also will be increased.

### More Expensive Wrapper

Aluminum Foil Expected To Promote Sales Of Butter

And now they're going to wrap butter in aluminum foil wrappers. The new wrappers henceforth will command a premium of 1 cent per pound, or seven cents a box, from the Montreal Provision Trade Association, a board of trade branch, it was decided.

Following months of study and consultation with leading dairy authorities, the association concluded Canadian butter would be greatly in appreciation and intrinsic value if the aluminum wrapper were used. The new wrapper costs twice the cost of the present covering, but it reduces the premium will induce producers to use the wrapping.

Commercial Traveller—"If a man has an income of two million a year, what is his principal?"

Cyprian—"A man with such an income usually has no principle."

The difference between a vertical and a horizontal boxer is ten seconds.

## Scientific Marvels

Dices Of Paper Saw Wood With High Speed Motors

Motors operating at 30,000 revolutions per minute and cutting wood with paper dices high speed turbine spouting jets of steam with a velocity of 23,850 miles an hour, model airplanes battling against man-made gales in excess of 80 miles an hour, and precision instruments capable of measuring within a millionth of an inch, were among the scientific marvels on display April 30 at the annual open house of the University of Michigan.

Among the exhibits were the Otto Ljungström internal combustion engine of 1870, a one-cylinder, four-cylinder, four-stroke, spark-plug, fired by a flame from a pilot light. Despite its crudity, the apparatus is said to have been the forerunner of the modern automobile.

## Canada Well Equipped

Could Build Planes For Britain's Royal Air Force

Canada is well equipped to produce efficient fighting planes, Brig-Gen. Sir William Alexander said at Quebec, as he headed the Canadian Pacific liner Empress of Australia for the British Isles. Former director of aircraft supplies and productions in England during the war, Sir William said Canada was a "likely place" for Britain to build planes for the Royal Air Force.

## New System For Dentists

Doctor Has Experimented Seven Years With Twilight Sleep

A new "twilight sleep" during which a fellow may have a tooth drilled or pulled without pain and still remain conscious was demonstrated before the New Jersey Dental Society at Atlantic City, N.J.

Dr. James F. Hangan, of New York, gave the demonstration, using as his patient a boy selected at random. Through careful regulation of nitrous oxide and oxygen a nurse kept the boy numb and impervious to pain, but yet able to carry on conversation with the dentist. Only the nerve "anesthetics" were used, the doctor said.

The boy said he experienced no sensation whatever. Dr. Hangan said no serious mishaps had resulted during seven years of the experiment with the system and he believed it was now developed to a point where all dentists could use it regularly.

## Record Is Unique

A record believed unique in aviation annals stands to the credit of Canadian Airways "Goldfields Express" Norseman. Within less than 10 hours, the machine was flown with skis, wheels and floats on the last trip out from Goldfields.

Venus is nearly twice as far from the sun as Mercury, and is almost the same size as the earth.

## WHAT HO!

By —  
RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER X.—Continued

"Maybe you think I couldn't get it?" said Mr. Wyncoop. "Why, between us we could raise ten million, twenty million, thirty million—"

"Sure. Me, you and Ernie." "I shall give the matter most serious thought," promised Sir Peter. "Perhaps you'd care to drop in on me in London street when you're in London—"

"I'll be there with bells-on," said Mr. Wyncoop. "Let's sing!"

"In a fog-born voice he croaked—"

"Out from the tall corn grows" rising when he came to the words "tall corn" and raising his hand above his head to show the phenomenal height attained by the crops of his native state.

"Jolly good, that!" applauded Sir Peter. "I say, let's get a couple of tenors and form a quartet."

With a champagne bottle under one arm, and Mrs. Clara-Maria Phelps under the other, the Earl of Bingley was making his way toward his study.

"I want you to see my snuggery," said the earl. "I mean something prints that may interest you."

"Snuggery?" giggled Mrs. Phelps. "Snuggery? What a snuggery word!"

"I brought this letter this along in case we got thirsty," said the earl. "Does one get thirsty in a snuggery?" inquired Mrs. Phelps.

"One does."

Seated, glasses in hand, on a sofa in the study they regarded each other with the eyes of lovers.

"I say, do you believe in love at first sight?" asked the earl.

"I?" said the startled Mrs. Phelps. "I don't mean Catechisms," said the earl.

"Really, your lordship, I haven't given the matter much thought of late."

"It's not a question of head," said the earl. "Hate you hate."

He thumped his stiff shirt in the region of his heart.

"Like champagne?" she asked.

"Just like champagne," said the earl. "It must be nice."

"Give it a try," urged the earl. He tilted their glasses.

"To my dream girl," he said.

"I believe you're flirting with me," said Clara-Maria Phelps.

"Some girls are as bright as eyes are beautiful," he said, and accompanied his words with a killing glance.

"It can hardly be described as a girl."

"Horse-and!" said the earl. "Mere hole in arms."

"I'm forty-four."

"That's just right. In sixty by the calendar—but twenty-one here."

Again he thumped his bosom. "I'm thirty," said Mrs. Phelps.

"Thirty? Oh, I see—Here you are."

Again he tilted her wine glass.

"Happy?" he asked.

"Yes, I haven't been so happy since I was chosen for the daisy chain at Vassar," said Clara-Maria Phelps, dreamily.

The earl raised his glass.

"Here's to knowing you better, toasts," he said.

She clinked her glass against his. "And vice versa, big boy," she said.

Parties end. Morning was stealing into the shoes of night when the earl sped the last guest to bed, and gained his own with only a little assistance from Crump. Soon scores of aristocratic and plebeian orisons sounded softly through castle halls.

In his tower room Ernest Bingley was sleeping the sleep of the reasonably just and very tired when something woke him. His eyes flew open and he found himself staring into the muzzle of a pistol pointed straight at his head.

WHERE'S JUNIOR? I CAN NOW LEARN HOW WE COULD PULL THAT BOAT!

NO!

YOUR MONEY BACK— IF SWITCHING TO POSTUM DOESN'T HELP YOU!

WHAT'S THE MATTER, SON? I'VE GOT THE TEARS!

I WANT TO STAY AFTER SCHOOL AGAIN!

YOUR MONEY BACK— IF SWITCHING TO POSTUM DOESN'T HELP YOU!

HE'S BEEN DRINKING COFFEE. COULD BE CHILDREN SHOULD NEVER DRINK TEA AND COFFEE. MADE WITH POSTUM.

BUT JOHN, HE DOES TRY HARD! BUT HE'S NERVOUS AND CAN'T SLEEP SOUNDLY!

WHY NOT DOCTOR LOOK HIM UP!

30 DAYS LATER

YOU'RE HERE! YOU'RE HERE! GETTING THE BEST MARKS IN YOUR CLASS THIS MONTH!

DON'T BE A GLOOM— DRINK POSTUM!

## CHAPTER XI.

"Stick 'em up, rat!" The voice began in an underworld bass and ended in a high pitched squeak.

It came from Master Merwin Wyncoop whose voice was changing but whose habit wasn't.

"For heaven's sake, Merwin, put down that gun," exclaimed Ernest. "It might be loaded."

"Was it you?" said Merwin. "But it ain't. This ole thing can't shoot, anyhow. I hustled it."

Ernest recognized the weapon as one of a pair of silver-mounted 18th century duelling pistols and guessed that Merwin had parried it from its case in the library.

"Loaded or not, please don't point it at me," Ernest said. "Didn't they teach you at military school never to be careless with fire-arms?"

"They didn't teach me nothin'!" said Merwin. "And stop squawking. I'm only practicing."

"To be a soldier?"

"Aw, there's no jack in that," said Merwin, and spat on the rug. "I'm going to be a big shot and run a racket."

It seemed to Ernest that it would be a good idea to stay on the right side of the scion of the house of Wyncoop. His apple-cart had passed, untipped, through a stormy night, but a few words from this fledgling gangster could dump the pippins into the gutter.

"How do you like staying in a real castle, Merwin?" asked Ernest, wondering how a boy could get so dirty so early in the day.

Merwin, expectorated through his teeth before he delivered himself of his views on castles.

"Aw, this crummy ole shack? We got better bath-rooms in the poorest back-house home. Pop and Mom say they're good to stick around as long as you'll let 'em, but I sure hope not. It's dead around here and it's got ghosts."

"How do you don't believe in ghosts, Merwin?"

"Naw. But if I seen one, I'd kick the gizzard out of him."

"Who told you about our ghost?"

"Ole Crump. He claims the ghost of a boy once. He was just my age, too."

"I doubt if he'll eat you, Merwin."

"He better not," said Merwin. "Do you know what time it is?"

"Certainly, Now."

Merwin consulted a new platinum wrist-watch.

"Six past eleven," he said, and Papa got a terrible hangover. So was Mrs. Phelps—"

"Not Mrs. Phelps?"

"Well, she's got ice on her head. He sent it through a crack in her door."

He began to drum on the wall with the butt of the pistol.

"Careful," said Ernest. "You'll break it even more."

Merwin glared at the wall a few more times to prove he could not be cornered, spit, and said,

"I don't go no good. What I want is a machine-gun."

"I saw some nice toy ones in a New York store," said Ernest. "They shoot cork."

"Corks!" Merwin was full of contempt. "I want a real gun that shoots bullets. Dum-dums. I need it."

"Need it?"

"Yeah. To pull a job."

"What job?"

"I got my eye on some swell ice."

"Ice?"

"Aw, dum-dums and pearls and junk like that," said Merwin, showing his disgust at Ernest's ignorance of the technical lingo of crookdom.

"Where, Merwin?"

"London."

"In a jewelry store?"

"Aw, I ain't interested in no petty larceny jobs," said Merwin. "The ice I mean is in that ole dump that looks like the Tower of London."

"The Tower of London?"

"You get me, too. They got a glass case full of sparklers any fence would give two-three hundred grand for it. It would be a cinch to climb the clovers that guard the stuff, kick in the glass, glow onto the plunder, and make a get-away in a high-powered car."

"A low-powered car wouldn't do, I suggest," said Ernest.

"Nops."

"I understand the crown jewels are protected by all sorts of electric alarms."

"I know all about them bugs," said Merwin. "I cased the joint. It's a soft touch."

"What about the Beef-Eaters?"

"Them boys in the capes? Say, if they got tough, well knock 'em out with our typewriters."

"Typewriter?"

"Say, ain't you ever been to the movies?"

"We always call a machine-gun a 'typewriter' so the G-men won't know what we're talking."

"I see. You'd just now down the poor old Beef-Eaters. They're quite a few of them, you know."

"So what? We'll have our ride, wouldn't we? Forty-five automatics."

"We?"

"Have you got a mob, Merwin?"

"Yeah. But I need two more right guys," replied Merwin. "So far I only got me and you."

"Not me," said Ernest hastily. "Master Merwin made me his face as hard as ice cold, and Fred Ernest with narrowed, beady eyes."

"Oh, yeah?" he snarled. "Oh, yeah?"

"No Hollywood heavy could have done it better."

"Oh, yeah?" said Ernest.

"Listen, wise guy," said Merwin. "You play ball with me or I'll sing."

"Go ahead, Start with 'Home Sweet Home'."

"Aw, when we sing, we mean talk," said Merwin.

"Spill the beans?"

"Want beans?"

"I have no beans," stated Ernest. "On, no? I got plenty on you."

Merwin glared at his chamberlain's voice. "Don't think I'm dumb just because I got flunked out four schools," sneered Merwin.

"Where?"

"Key-holes," replied Ernest, unabashedly. "See, the next time you're out, I'll be a very grand one. It is."

"Cost seventy-five fish," said Ernest. "Mom give it to me. And Pop promised to give me a high-powered roadster soon as we get back home. Try and figure out why, you two-tim-in' heel."

"Backward and bribery, I suppose," said Ernest unhappily.

"It sure is," agreed Merwin, proudly. "I got it the dips on this frame-up. So kick-in or else—"

"Or else what?" asked Ernest, wondering if he pushed Merwin, the most, it would be accounted more than a venal sin.

"(To He Continued)

Probably the greatest distance chieftain on any nation is that on one in an old fort near Hamilton, Bermuda. It reads: "London, 3,000 miles." A homebuilt engineer is believed responsible.

## Influence Of Environment

Lead To Determine The Growth Of A Child's Development

There is no correlation between the intelligence of children and their environment, and the influence of environment determines the growth or decline of children's intellectual development, according to a study of 35-year study of children by Dr. Harold Siegel and Dr. Beth Wellman of the Iowa University Child Welfare Station.

Dr. Siegel, psychologist for the Iowa State Board of Control, has observed that underprivileged children, taken from inadequate environment and placed in foster homes, respond to love, interest and comfort by remarkable intellectual gains.

He finds no correlation between the intelligence of their parents and their children, but notes the larger, small boys and girls remain in poor surroundings, the duller they become.

He points out that if these children are removed early enough to foster homes they have a good chance to reach normal or superior mental development.

Dr. Wellman has recorded that higher intelligence levels are the rule, not the exception following the stimulating atmosphere of nursery schools. Significantly, during summer vacations at home, without the incentive of school and influence of companionship, children show little or no development.

Miss Wellman studied the later progress of many boys and girls who received careful and sympathetic early training and discovered those transferred to progressive institutions of this type continued to gain in intelligence, while those who entered non-progressive schools lost considerable ground.

"Children thrive best," Dr. Wellman concludes, "in schools where they are taught to think for themselves instead of obeying blindly."

"So what? We'll have our ride, wouldn't we? Forty-five automatics."

"We?"

"Have you got a mob, Merwin?"

"Yeah. But I need two more right guys," replied Merwin. "So far I only got me and you."

"Not me," said Ernest hastily. "Master Merwin made me his face as hard as ice cold, and Fred Ernest with narrowed, beady eyes."

"Oh, yeah?" he snarled. "Oh, yeah?"

"No Hollywood heavy could have done it better."

"Oh, yeah?" said Ernest.

"Listen, wise guy," said Merwin. "You play ball with me or I'll sing."

"Go ahead, Start with 'Home Sweet Home'."

"Aw, when we sing, we mean talk," said Merwin.

"Spill the beans?"

"Want beans?"

"I have no beans," stated Ernest. "On, no? I got plenty on you."

Merwin glared at his chamberlain's voice. "Don't think I'm dumb just because I got flunked out four schools," sneered Merwin.

"Where?"

"Key-holes," replied Ernest, unabashedly. "See, the next time you're out, I'll be a very grand one. It is."

"Cost seventy-five fish," said Ernest. "Mom give it to me. And Pop promised to give me a high-powered roadster soon as we get back home. Try and figure out why, you two-tim-in' heel."

"Backward and bribery, I suppose," said Ernest unhappily.

"It sure is," agreed Merwin, proudly. "I got it the dips on this frame-up. So kick-in or else—"

"Or else what?" asked Ernest, wondering if he pushed Merwin, the most, it would be accounted more than a venal sin.

"(To He Continued)

Probably the greatest distance chieftain on any nation is that on one in an old fort near Hamilton, Bermuda. It reads: "London, 3,000 miles." A homebuilt engineer is believed responsible.

G-Man—"Got away, has he? Did you guard all the exits?"

County Constable—"Yes, but we think he must have left by one of the entrances."

## Inherits Fortune

Farmer Inherits \$200,000 From Uncle He Betrieded 40 Years Ago

Fortune's horn of plenty is pouring \$200,000 into the lap of George Robinson, farmer of the Conkling district, 175 miles northeast of Edmonton, because he was kind to a Klondike prospector 40 years ago.

"When I was a lad of 22, I grubstaked an uncle for the gold rush of '88," he said. "Forty years passed and there was no word from my uncle, Jobe. Then, just a few months ago, I got a message from a Seattle solicitor. Now I am owner of a \$200,000 foot farm in Alaska and a \$250,000 ranch in Montana."

They were bequeathed to me by the uncle I had almost forgotten, but who never forgot an act of kindness."

A widower, father of five children, the 62-year-old farmer was in Edmonton, planning to sell his farm 180 miles north of the city to take him to Alaska, where he will take charge of his newly-acquired fox farm.

"I took my \$3,000 out of the bank at 10 o'clock one morning. At 11 a.m. Jobe was aboard the train and heading for the Klondike," he said. "I never saw or heard of him again until word came from Seattle last January."

## Political Pastorage

Speaker Sir is Unknown In The British Civil Service

Political pastorage is unknown in the British civil service and any one who is appointed to such a position to enlist political support is automatically disqualified. Sir Francis Flavel, British high commissioner to Canada, told the house committee of civil service affairs.

In the British scheme there is no appointing of former members of parliament to government jobs and ministers' private secretaries are not absorbed in government service after their tenure of office as private secretary.

Open competitive examination held under the direction of the civil service commission was the keynote of the service.

This commission was appointed under letters patent by the prime minister and in its personnel comprised of civil servants. It set the examinations, issued certificates of appointment and controlled the internal affairs of the service.

## CARMANGAY

The Rev. Canon Winter will hold Holy Communion Service in Emmanuel Church at 11 a.m. May 15th. The occasion is the Sunday nearest to the first anniversary of the Coronation of King George and Queen Elizabeth.

The Sunday School room of the United Church was the scene of a delightful banquet last Friday evening when the senior group C.G.I.T. entertained their mothers in honor of Mother's Day. The address of welcome made by Haberta Crantz, was responded to by Mrs. C. W. Folk on behalf of the mothers. The following toasts were proposed: The King by Agnes Wilson; The Church, by Laura Brandvold, replied to by the Rev. H. G. Smith; Our mothers, by Dorothy Cook, replied to by Mrs. A. F. Wilson; Our Leader, by Margaret Crantz, replied to by Miss Margaret Smith.

Contrasts, under the direction of Agnes Wilson, followed the banquet and were enjoyed by all. Mrs. Crantz won the spelling contest against Mrs. H. S. Packer's, while Mrs. James Owen and Viola Cook were the winners in a growing competition. A very happy evening was brought to a close by the

## JOSHUA B. THOMPSON LAID TO REST.

The funeral service of Mr. Joshua Baxter Thompson who died Tuesday, May 2nd, following a heart attack was held in the United church at 2:30 on Friday afternoon, at which many friends and neighbors attended to pay their last respects to one who was a loving husband and father.

The deceased was born in Winterset, Iowa on October 26, 1868, coming to Canada in 1912, and has been a resident of Carmangay since 1924. He had been very well and active up to the time of his death.

Besides his wife he leaves four daughters: Mrs. A. McEachern and Alice of Kelowna, B. C., Met of Calgary and Velma of Lethbridge; two sons Edward of Calgary and Floyd at Carmangay. One sister, Mrs. Geo. Drost of Kansas City Mo., and one brother of Fort St. John B. C.

Two granddaughters: Iris and Goldie who reside in Kelowna, B. C., also attend their mother's death in 1924. There were many floral offerings.

The Carmangay Hospital Auxiliary will hold a meeting Saturday night at 8 p.m. The election of officers for the year will take place. A large attendance is desired.

The A. Y. P. A. held their last meeting for this season on Monday evening. Following a short business session, groups were formed for a "Scavenger Hunt" which led them on a merry chase and on returning to the hall, refreshments and dancing were enjoyed.

These meetings have been very popular with the members during the winter months and have been a great help to the young people in providing them with fine entertainment.

### Card of Thanks

I wish to thank Dr. Freeze, the nurses, and all those who were so kind to me while I was in the Carmangay Hospital.  
Florence Brownell.

### Card of Thanks

Mrs. J. B. Thompson and family wish to thank the friends and neighbors for their many expressions of help, and kindness; also the beautiful floral tributes, in their time of bereavement.

## FIGURES IN A BOOK?

What gives rise to a loan?

★ ★

"Credit can only be issued against real assets... The amount of credit must always be limited to the amount of free money..."

That was written by one of the greatest of Socialists—by the late Viscount Snowden of Ickneshaw, Philip Snowden, in 1935—little more than two years ago.

Few stood so long or so resolutely in the forefront of public controversy, or aroused such fierce opposition by vigour of opinion or severity of tongue—and none passed to his rest having earned greater public respect than Viscount Snowden.

His career was a triumph of sturdy British character. He took an unpopular course during the Great War, but later became one of his country's great figures, standing firmly for his convictions and for soundness in the financial structure of Great Britain.

His words quoted above apply to Canadian banking today with all the force with which he applied them that day to banking in England. The Canadian banking system is a British system, adjusted from time to time to fit the needs of a developing nation in the changing scene of this new world.

Credit can only be issued against real assets. That is as true today as ever. You cannot create credit by writing figures in a book. You cannot make loans regardless of deposits, collateral or repayment, then write the loans up with a fountain pen as figures in a book labelled "Deposits" and lend them over and over.

If you could, then bankers in any country would need no more than a fountain pen to prevent bank failures.

During the last ten fiscal years Canada's chartered banks have paid more than \$397,000,000 in interest on deposits. If they could create deposits by the magic process of writing figures in a book, they could have saved that \$397,000,000!

And if banks could lend ten times the amount of their deposits, collecting interest each time, bank profits would become a national scandal, dividends would be paid in astronomical figures, people would be selling all they had to buy bank shares, and there would be a land office rush on at Ottawa for bank charters.

But what are the facts?

Bank profits last year averaged less than half of one per cent, on total assets—a lower margin than that of any other class of business, corporate or individual.

Dividends are less than 4½ per cent, on shareholders' investment; nobody is scrambling to sell all he owns to invest in bank shares, and there is no land office rush at Ottawa for bank charters—though no application has been refused in the last fifteen years.

Banks perform no miracles.

They keep cash reserves more than sufficient to meet the average daily withdrawals. They keep much more in forms readily convertible into cash, should any emergency ever arise.

By reason of their strong liquid position Canada's chartered banks have money awaiting demand—just awaiting safe loaning opportunity.

Banks cannot lend money unless people want to borrow it. They have no monopoly of the business of extending credit, for the cash reserves of many other corporations find a useful earning outlet in the same way.

Some loans directly give rise to deposits; but have you ever considered what it is that gives rise to a loan? A man's realizable assets accumulated from his own work, plus his own character, ability and willingness to repay.

All deposits are not the direct result of loans. People do not borrow money and pay interest on it to leave it on deposit at a lower rate or no rate at all.

They borrow money for use. They draw it out promptly and use it in the expectation of making a profit over and above the bank charges.

Let us remind you that deposits of any kind are always payable to the depositor, or to his order, in cash.
